# BASIC CONCEPTS and CONTROVERSIES in Critical Care Nutrition

**gaspen** | GEORGIA SOCIETY FOR PARENTERAL  
AND ENTERAL NUTRITION  
A Chapter of the American Society for Parenteral and Enteral Nutrition

NOON - 1 P.M.

## Niles M. Mehta, MD

Professor of Anesthesia, Harvard Medical School  
Director, Quality and Outcomes  
Director, Critical Care Nutrition  
Associate Medical Director, Critical Care Medicine

### PRESENTATION OBJECTIVES

- ✓ Review basic concepts of pediatric critical care nutrition including cellular metabolism, metabolic stress response and muscle loss
- ✓ Discuss controversies in pediatric critical illness including under and over feeding, muscle preservation and parenteral nutrition
- ✓ Present an individualized approach to feeding the critically ill child to include timing, dose and route for feeding
